

# CONTROLS EXTRA LOW VOLTAGE- CLIP IN 24 VOLT DAMPER MOTORS

AdvantageAir

## FEATURES

- Grey in colour.
- 24 Volts AC.
- Drive return.
- Motor switches off when not driving saving energy and running costs.
- External indicator shows damper position.
- Low profile enables damper to fit in tight spaces
- Comes preinstalled and tested on Advantage Air Exact Air Regulators and Advantage Air barrel dampers.
- Fast 16 second open to closed drive time.
- Powerful 2.5Nm-torque motor will drive any Advantage Air damper
- RJ 12 clip in connection (for easier connection).
- Low cost
- Quiet operation
- Colour coded for easy identification (Clip 24V motor has grey lid)
- Three point positive fixing system allows motor to be installed upside down
- Tough external casing
- Plastic shaft adaptor prevents “cold bridging”

## CONSTRUCTION

- Body and lid is injection moulded from a blended engineering plastic.

## APPLICATIONS

- Suitable for all domestic and commercial two position (open, closed) applications under 2.5 Nm.
- Suitable for all Exact Air Regulators and Advantage Air barrel dampers 150 dia to 550.

## DIMENSIONS
